EDUCATION

B.Tech – Computer Science (Cyber Security)
VIT Bhopal University
2023 – Present

TOP GRADES

Discrete Mathematics
Computer Physics
Probability & Statistics
C++ Programming
Applied Linear Algebra

TECHNICAL SKILLS

Languages: Python, C, C++, HTML, CSS, JavaScript

AI / ML: TensorFlow, OpenCV, Scikit-learn, CNNs, Grad-CAM, Random Forest, Regression, Clustering (K-Means, DBSCAN, HDBSCAN), PCA, t-SNE, UMAP

Backend / Tools: FastAPI, Git, VS Code, Google Colab, Kaggle, HackerRank, Android/Mobile

Enterprise: ServiceNow (Admin Fundamentals, Agentic AI, Micro-Certification)

Soft Skills: Financial Planning, Public Speaking, Team Leadership, Social Media Strategy, Event Management

LEADERSHIP & EXTRACURRICULAR

E-Cell | Finance & Marketing Team
VIT Bhopal University

- Managed event budgets and vendor negotiations.

FYI Club | Social Media Team
VIT Bhopal University

- Curated content and tracked engagement metrics.

NSS – National Service Scheme | Onstage Team
VIT Bhopal University

- Coordinated logistics for public events and drives.

PROFESSIONAL SUMMARY

A passionate Computer Science undergraduate specialising in Cyber Security, with a deep interest in the intersection of Artificial Intelligence and security systems. I enjoy exploring how machine learning models can be both powerful and vulnerable — and building solutions that are intelligent, explainable, and privacy-aware. Outside of tech, I am drawn to leadership, community impact, and creative problem-solving, and I thrive in collaborative, fast-paced environments.

TECHNICAL PROJECTS & HACKATHONS

SkinScan — AI Skin Cancer Risk Assessment | Johns Hopkins University × VIT Bhopal Health Hackathon | Semi-Finals
Team: Akriti Khantwal, Megha Gupta, Chinmay Patil, Ayush Goyal, Shivam Singh

- Built a full-stack web app for 7-class skin lesion classification using a CNN trained on the HAM10000 dataset (~85% accuracy)
- Implemented ABCD rule visualiser (asymmetry, border, colour, diameter) with Grad-CAM explainability heatmaps
- Integrated Fitzpatrick skin-type CNN, coin-based lesion calibration (12 Indian coins), and Random Forest clinical risk fusion
- Delivered bilingual (English/Hindi) responsive frontend using HTML5/CSS3/JS with a FastAPI backend
- Tech Stack: FastAPI, TensorFlow, OpenCV, Scikit-learn, HTML, CSS, JavaScript

Membership Inference Attack — Cyber Security Audit of an ML Model | Personal Project | GitHub: github.com/janhavikasture

- Designed a Membership Inference Attack (MIA) framework to audit whether a Decision Tree model 'leaks' private training data
- Built a secondary Random Forest classifier as the adversarial 'hacker' model, using confidence, correctness, and entropy signals
- Demonstrated that pruning the Decision Tree significantly reduces the privacy gap without sacrificing meaningful accuracy
- Showed that high training accuracy is a double-edged sword — it can be exploited as a privacy vulnerability

Personal Portfolio Website HTML, CSS, JavaScript
janhavi-resume.netlify.app

- Designed and built an interactive, cyber-security-themed personal portfolio site with custom 'decrypt' animation gating entry to the page.
- Structured dedicated sections for skills, projects, certifications, and feedback, with an integrated logo-reveal video intro. ● Deployed and hosted the site on Netlify, with direct links to LinkedIn, GitHub, and email for recruiter outreach.

PyDROIDX Hackathon — Cyber Security & ML Workshop | Android Club, VIT Bhopal

- Participated in an intensive hackathon focused on cyber security and machine learning
- Developed security-focused solutions integrating ML algorithms

VIRTUAL INTERNSHIP

ServiceNow Virtual Internship Program | AICTE & TheSmartBridge | Supported by ServiceNow

- Completed hands-on modules on cloud-based workflow and automation platforms used across IT, HR, security ops, and customer support
- Completed courses: Welcome to ServiceNow & Micro Certification, Introduction to Agentic AI, ServiceNow Administration Fundamentals
- Bridged academic learning with enterprise-grade industry application of cloud automation tools

CERTIFICATIONS

- Microsoft Certified: Azure Fundamentals — AZ-900
- Machine Learning with Python — IBM / Coursera
- HackerRank — Problem Solving (Basic)
- GDGC — Tech Winter Break Event
- Android Club — AcWoC'25
- Android Club — PyDROIDX
- WWT Women-Only Hackathon — Shooting Stars Foundation
- JHU × VIT Bhopal Health Hackathon — Semi-Finalist (SkinScan)
